Software Engineer with over 5 years of experience specializing in building accessible web experiences, scaling high-performance systems, and shipping reliable web applications.

Work Experience

Senior Frontend Developer — **InfinitiBit** — **March 2025–Present**

- **Lead Frontend Developer** for the **Graphbit Cloud Platform**; architected and developed the core **React** frontend for a robust SaaS platform streamlining the AI application lifecycle.
- Spearheaded development of complex, **web-based applications for global enterprises**, focusing on front-end architectural design and technical direction.
- Built scalable backends using **FastAPI, PostgreSQL, MongoDB, and Redis** to support data-heavy applications.
- Established **build processes, automated testing, and asset management** to ensure high code reliability.
- **Mentored** and guided frontend developers, fostering a culture of technical excellence, collaboration, and continuous improvement.
- Collaborated in **Agile** sprints for rapid prototyping, iterative delivery, and team alignment.

Software Engineer — **Giga Tech Limited** — **March 2023–March 2025**

- Built AI-focused web applications from the ground up using **React and Next.js**, specifically targeting Machine Learning and NLP workflows
- Implemented **8+ Data Extraction methods** for NLP and machine learning datasets.
- Designed and implemented a **Bengali Search Engine interface**, optimizing performance and user experience for high-precision information retrieval.
- Built web application to manage and monitor various web crawlers for collection of Bengali Data.
- Engineered a **comprehensive dataset management tool** (similar to Hugging Face) and managed multiple **microservices** for performance and scalability.
- Contributed to the development and maintenance of multiple **microservices** within the company, including building key services from the ground up, adding new features, and ensuring ongoing performance and scalability improvements

Software Engineer — **Workspace Infotech Limited** — **Sep 2021–Feb 2023**

- Built **4+ web application**s with **React and Next.js** from the ground up as the Lead Front End Developer.
- Achieved **Lighthouse scores >90%** for high-traffic applications through close collaboration with UI/UX and API teams.
- Spearheaded architectural rewrites resulting in a **40% decrease in load time** and enhanced accessibility.
- **Mentored 3+ colleagues** on **React** best practices and assisted in project onboarding..

Full Stack Developer — **Oiiu** — **July 2020–August 2021**

- Developed and maintained a high-traffic **GraphQL and Next.js** e-commerce platform scaling to thousands of users.
- Migrated a monolithic backend to a **Mesh GraphQL Server** built on top of BigCommerce to improve system modularity.
- Engineered internal analytics tools that led to a **20% increase in user engagement**.

Technologies and Languages

- **Languages:** TypeScript, JavaScript, Python, HTML5, CSS3.
- **Front End: React**, **Next.js**, React Flow, **Mapbox**, Redux, Styled Components, Tailwind CSS, Angular, React Query, Apollo Client.
- **Back End:** Node.js, **FastAPI**, Express, NestJS, **GraphQL**, Apollo Server, **Redis**, Postgres, MongoDB, Firestore, SQLAlchemy, Pydantic.
- **DevOps & Tools:** GCP, Cloud Function, Cloud Storage, Docker, Firebase, **GitHub Actions (CI/CD)**, Jest, Cypress, Figma, JIRA.

Projects

- **Graphbit Cloud Platform (AI/SaaS)**: Architected the core **React** frontend for a SaaS platform streamlining AI agent lifecycles. Established foundational build processes and automated testing for global enterprise tools. platform.graphbit.ai
- **SEPAS (Energy Tech)**: Led the implementation of **complex geospatial network builders** and topological graph visualizations using **Mapbox, Elkjs, and React Flow** for power grid modeling and renewable energy optimization.
- **Corpus Hub (AI & ML)**: A centralized platform for managing interconnected data extraction methods (Crawlers, Datasets, and Bengali Dictionary). Implemented **8+ distinct data extraction workflows**. corpus.bangla.gov.bd
- **Label Hub (AI/SaaS)**: A specialized platform for **NLP and Machine Learning** data extraction and analysis, focusing on high-precision data labeling and iterative ML pipelines. label-hub.gigatechltd.com
- **Information Retrieval (Bengali Search Engine)**: Designed and developed a high-performance **Bengali searching platform** focused on seamless integration and enhanced information retrieval. Optimized the interface for a seamless search experience within broader data ecosystems. ir.bangla.gov.bd
- **Merchaint (E-Commerce)**: Scaled a modern frontend to thousands of users using **React and Next.js**. Implemented SSR, client-side caching, and multi-level authorization, resulting in a **40% load time reduction**. merchaint.com
- **Wearit (E-Commerce)**: A multi-vendor platform featuring loyalty points and bulk management. Migrated the backend to a **Mesh GraphQL architecture** to support high-volume concurrent traffic.

Honors & Awards

- **Champion (1st Place), Graphbit Agentic AI Hackathon | 2026** Developed an autonomous agent for document classification using a multi-stage ML pipeline (BM25, FAISS, Qdrant) and a **React** frontend for case management.

Education and Certifications

- **B.Sc. Computer Science & Engineering,** North South University, Dhaka. **2015–2019**
- **Front End Engineer in React Certification,** Mangtas **2022**

Interests

I am an avid reader and film buff who enjoys exploring new cutting-edge web features and AI-integrated UI/UX patterns.
